Press Release

Knight Vinke announces Zurich Office opening

Knight Vinke Asset Management, the institutional asset manager known for its forensic research and professional shareholder engagement, announces the opening of its offices in Zurich. Knight Vinke also has offices in New York and Monaco.

Knight Vinke has a long term approach to investing and uses deep, proprietary fundamental research to identify value creation potential in complex public companies. Knight Vinke unlocks this potential by engaging with the management, board and advisors of these companies as well as through public debates, recognizing that these companies are frequently misunderstood, even by insiders, due to over-reliance on consolidated financial statements, information overload, and the use of wrong metrics to measure risk and performance.

The firm has built a strong reputation in a number of industries, in particular including banking, energy, utilities, retail, mining and pharmaceuticals. The majority of Knight Vinke's clients are amongst the largest public pension funds and sovereign investment institutions in the world.

Knight Vinke is proud to have been the principal sponsor for 3 years of the Kispiball, raising money for the Zurich Kinderspital, and is delighted to sponsoring this year's event again on 22 October in Zurich. The ball is an important fund-raising event supporting the ground-breaking work undertaken with children at the hospital.

"Given the long tradition and the recognized expertise of the Zurich financial community it is important for us to be represented here and we are delighted to be announcing this development. We are also particularly pleased to be able to support the tremendous and pioneering work carried out at the Kinderspital, with our sponsorship of the Kispiball", said Eric Knight, CEO & Member of the Board of Directors of Knight Vinke Asset Management.
